Introduction

I am deep tech product development, management and strategy leader with extensive experience in web & mobile technology along with data science and engineering methodology. I am also known for developing & managing cutting-edge tech products and for inspiring high-performance teams. I am passionate about comprehending customer needs and providing solutions that address them.

DEEP TECH product development & management, product design, growth, custom Android OS, app stores, app marketplaces, ad monetisation, AWS, IoT Devices, and data engineering are some of my specialties.

I have accomplished the objectives of 3 start-ups and 5 MNCs since pursuing my dream of success in the tech product over the course of my 16+-year career in the internet and technology industry

Planning , Strategies, Scheduling & Executions are my daily routine task.

Mission

Helping early stage startup, start-up or company to grow super-fast & in the unique style.

[**Tech product , Marketing Strategies , Data Research , Automation , Training**]

More about me…

Never Give-Up Attitude, Exceptional Capabilities, Unbelievable Velocity & Accuracy

A diligent, trustworthy, devoted, brave, and fearless individual. Consider a start-up in its early stages as a charming little kid that needs to be raised with love, commitment, and honesty. A small baby that, when it grows up and becomes a successful organisation, will look after hundreds of people.

Ardour for riding on beaches and on high altitude mountains. Top of the bucket list will always be travelling around the arc of this planet and crossing the seas (on a very special motorbike that travels at JET's speed).

I feel good about taking on obstacles and jogging on tough terrain.

My 16+ years professional journey so far …

Sl no	Skills	Role	Duration (in years)	Current Status
1.	HOPO HOMES LLC DUBAI	CTO	3+	Pre-seed before pandemic
2.	FARMLEY	CTO	2	Series A (Total raised 15 Mn USD till Dec 2023)
