Introduction

Then, A man who started early stage school without footwear and now developed many applications and business strategies. A man, who walked on thorns without footwear in childhood, now rode on every high altitude mountains in India wearing a riding suit & boot and having two royal Enfield and 1 BMW bike. Anything can be achieved if the right things stand by my side at the right time.

Mission:

Helping early stage startup, start-up or company to grow super-fast & in the unique style.

[**Tech product , Sales Leads , Marketing Strategies , Data Research , Automation , Training**]

About Me:

Never Give-Up Attitude, Exceptional Capabilities, Unbelievable Speed & Accuracy

A hard core work dedicated, honest, loyal and fearless. See an early stage start-up as a little cute baby who should be raised strongly with honesty and loyalty. A little baby who will take care of hundreds of people once it's grown up and turned into a profitable organization.

Passion to ride on high altitude mountains and on beaches. Riding on the curve of this planet and crossing ocean (on super special motor bike which runs at a speed of JET) will always be on top of the bucket list.

Taking challenges and running on difficult path make me feel good.

Expectations

- The work should be challenging
- There should be a clear vision of the business model
- There should be 'No give-up' attitude in founders & in investors
- Good to have if some bigger player with deep pockets will be our competitors
- A company which possesses innovative thinking and culture
- A company which strictly follow 'Get what you deserve'
- A handsome & deserving [Compensation + Equity] , it should not hurt my feelings and also it should not be a burden on company too.
- Parallel growth – My growth & company growth should be in parallel
